A Need for Better Healthcare.

The Assured Direct Care* (ADC) network addresses the rising healthcare costs and reduced quality of care. ADC provides you with a smarter alternative to affordable and quality care coverage through unrestricted primary care access, eliminating middlemen. Direct primary care is a healthcare plan between employees and doctors without going through and billing an insurance company. This allows us to focus on you and not the ever-increasing requirements of third party demands.

We're changing the mindset of how we think about, use, and pay for quality health care.
